DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3, 4, and 6 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record, taken as a whole, does not show nor suggest the combination of limitations required by the claims. Wenzel '977 is considered the closest art. Wenzel discloses an oil ring with rails 41 and 40, which have curved surfaces. However, the surfaces are not "barrel curved" in that the curve does not "nip" back in at the lower edge to create the bulge between the two edges as a barrel curve does. Rather, it appears Wenzel creates more of sharper edge at the lower side of the rails. In other words, a "barrel curved" surface creates an apex, or highest point, at a location other than at an edge/end of the curve. Geffroy '952 (Figs. 23-25) and Jackson '315 (Fig.5) show barrel-curved surfaces. However, there is no motivation to modify two rails of an oil ring in the manner required by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
